Alibaba Cloud CDN Homework

Website Guide - Version 1

Student: Yasser Homoud Alharbi

Student ID: 462117830

Verification token: 462117830-CDN-20261102

Project Overview

This project uses GitHub Pages to host a static website.
Alibaba Cloud CDN is intended to deliver and cache website resources
after the CDN domain and DNS settings are configured.
The site includes HTML, CSS, JavaScript, a PNG logo, a JSON file,
and this downloadable PDF guide.

Resources to Verify

- index.html - Main website (Version 1)
- css/style.css - Page styling
- js/app.js - Loads the JSON message
- images/logo.png - Student logo
- api/news.json - Test data (Version 1)
- downloads/guide.pdf - This guide

Note: This guide describes the project; it does not certify that CDN is configured.
